

LG NeON™ 2

LG has introduced the NeON™ 2, with newly developed CELLO Technology which improves performance and reliability.

Up to
320W

300W

THE RIGHT CHOICE FOR YOUR ROOF.

TOP GUARANTEES

EXTENDED PRODUCT GUARANTEE

LG has extended its product guarantee by a further 2 years to 12 years.

How you benefit: even more security for you.

25-YEAR LINEAR PERFORMANCE GUARANTEE

LG offers a linear performance guarantee with a nominal output of 83.6% after 25 years.

How you benefit: LG guarantees higher performance than many other manufacturers.

TOP QUALITY

INTENSIVE QUALITY TESTING PROGRAMME

LG panels meet the highest quality criteria thanks to (quadruple) tests which go way beyond IEC standards.

How you benefit: very low risk of the modules failing.

EXTRAORDINARY DURABILITY

The reinforced frame constructions can withstand pressure of 6,000 Pa (snow) on the front and 5,400 Pa (wind) on the back.

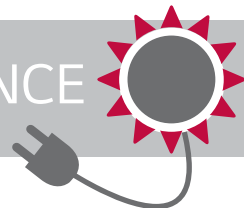

How you benefit: LG modules can cope with extreme weather conditions.

LIGHTWEIGHT AND STRAIGHTFORWARD

At just 17 kg, LG panels do not put much weight on your roof.

How you benefit: even roofs with a low static weight-bearing capacity can be fitted with LG modules.

TOP PERFORMANCE

HIGH OUTPUT

The new LG NeON™ 2 modules achieve an output of up to 320 watts per panel with just 60 cells.

How you benefit: very high output even from small areas.

HIGH EFFICIENCY EVEN IN POOR LIGHT

All modules boast a high output even in poor light.

How you benefit: LG modules are more efficient than many other panels in cloudy weather.

BETTER PERFORMANCE ON HOT DAYS

Improved temperature coefficients make for better performance on hot days.

How you benefit: reliable power generation even in very hot weather.

POSITIVE OUTPUT TOLERANCE

LG supplies all of its solar modules with a positive nominal output tolerance of up to 3%.

How you benefit: the panels often outperform their specifications.

TOP DESIGN

ATTRACTIVE ROOF

Manufactured to excellent standards and made from high-quality materials, LG panels improve the look of your roof.

How you benefit: thanks to their aesthetic design, LG modules can increase the value of your property.
